

The Brain Optimization and Synchronization System™

Innovation Technologies and Energy Medicine (ITEM) has developed a new technology that promises to revolutionize the way we think about human energy and *balance* - the **Brain Optimization and Synchronization System™** (BOSS™) (Visit <http://www.item-bioenergy.com/motion/boss>).

BOSS™ is a custom-engineered motion therapy table designed for horizontal rotation. The BOSS™ horizontal motion experience provides the following objective benefits: physical and mental relaxation; stabilization of brain activity and other physiological responses such as blood pressure; synchronization of the brain hemispheres; and improved sleeping patterns. Evidence is available that BOSS™ improves hand-eye coordination, fine motor skills, cognitive functioning, and overall intelligence.

BOSS™ is **more relaxing than a spa or a massage** - and more beneficial for your entire mind and body. The table produces a relaxed, mentally alert state quickly (low Alpha - Theta state), which facilitates hypnotherapy and other treatment methods. BOSS™ can also be used as a massage or chiropractic table. Additionally, BOSS™ acts as a **full-body acupressure stimulator** when used in accordance with ITEM's recommendations. This table is perfect for the home or medical office. BOSS™ "healing centers" are springing up all over the world!

BOSS™ is also a full-body acupressure system when used as recommended by ITEM...

Specifications
